A SURE CURE FOR CROUP.

Twenty-Five Years' Constant Use Without a Failure.

The first indication of croup is hoarseness, and in a child subject to that disorder the approach of an attack. Following this hoarseness is a peculiar rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse, or even after the croupy cough appears, it will prevent the attack. It is used in many thousands of homes in the broad land, and never disappoints the anxious mothers. We have yet to learn of a single instance in which it has not proved effectual. No other preparation can show such a record—twenty-five years' constant use without a failure. For sale by all druggists.
